Professional Experience

Results-oriented Programmer with over 8 years of experience in software development, specializing in cross-platform applications and object-oriented programming. Proficient in the complete software development life cycle, from design and development to testing and deployment. Adept at collaborating with interdisciplinary teams and communicating complex technical concepts effectively. 2 years of project management experience coordinating efforts with Game Producers, Release Managers, QA Engineers and development team members.

Skills

Programming languages	JavaScript, TypeScript, C#, C/C++
Technologies	Cocos Creator, Unity, Phaser, React, XCode, Android Studio
Tools	JIRA, Trello, Figma, Git, SVN, TeamCity, New Relic
Practices	Agile/Scrum, CI/CD, Code Review, Memory Profiling

Work Experience

Client Engineer, Penn-Interactive (May 2024 to June 2025) Greenfield, MA/Remote

Projects - *Neon Vault Slots*, *Hollywood Casino* [Product URL](#)

Designed and maintained front-end architecture for slots and other casino games, implementing game logic, animations and backend driven updates.

Senior Game Programmer, A5 Labs (December 2021 to September 2023) Remote

Project - *World Poker Tour Global* [Product URL](#)

Worked as the front-end programmer of the most popular card game, Poker. Game was available on mobile and desktop platforms. Handled the payments page of the application. Tracked the health of the project with tools like New Relic.

Game Programmer, Bombay Play (December 2019 to December 2021) Bengaluru, India

Project - *Card Wars*

Led front-end development for a new PvP card battler featuring unique cards and quirky, upgradeable characters. Played a key role in team building by interviewing and onboarding front-end engineers.

Senior Game Programmer, Ruby Seven Studios (May 2019 to September 2019) Kochi, India

Worked on the brand-new project for mobile platforms as the lead programmer in the team. The application is based on URL loading in WebView which helps in reducing the asset size, resulting in small-sized app to be downloaded on mobile devices.

Game Programmer, Ruby Seven Studios (April 2017 to May 2019)

Projects - *Lucky North Casino* [Product URL](#), *Multi-Play Video Poker* [Product URL](#)

As part of the in-house resource pooling I was assigned to the mobile poker team to work on the iOS project. Handled the project independently according to the directions from the team lead. Directly responsible for testing and quality control.

Junior Programmer, Ruby Seven Studios (June 2015 to April 2017)

Project - *Big Spin Bingo*

Communicate and discuss with the Quality Assurance/LiveOps team on the issues reported on the product and work with the development team on fixing the product flaws. Reporting the sprint development progress in the daily stand-up meetings (Scrum).

Education

Bachelor of Technology, Computer Science and Engineering

Mahatma Gandhi University, India 2011 - 2015

Other skills and fun facts
